2013 Distinguished Graduate

Kyle Haley
Math

"If you cannot find the solution, you do not understand the problem."

-Author Unknown

Biography

Working hard over the last few years, Kyle has been actively seeking an education in mathematics, computer science and English. A high school dropout, Kyle decided to go back to school at the age of 23 shortly after obtaining his GED. A full time student while maintaining a full time job, occasionally combined with a part time job, he has proudly managed a cumulative GPA of 4.0 with over 110 credit hours to date.

In May of 2012, he obtained his first diploma, an Associate of Arts in English and he was also the Distinguished Graduate in English for the 2012 academic year. On June 2nd, 2012, he married his beautiful wife Laura Shaw. He hopes to attend MIT and bring her with him to Boston in the Spring of 2014 to complete a degree in Computer Science and possibly a separate degree in mathematics, his most difficult subject and one he desires to conquer. He is currently a member of Phi Theta Kappa and the Cheshyre Cheese Club, a creative writing club at San Antonio College.

On a personal note, he would like to thank the body of instructors at San Antonio College for having faith in his abilities to succeed, for their guidance and active role in his education and, most importantly, their friendship. There is always a body of proud instructors behind an accomplished student and he is no exception.
