## Victoria Regalado

**BIOLOGY PRE-PROFESSIONAL**

*“I am thankful for my struggle because without it, I wouldn’t have stumbled upon my strength.”*

– Alexandra Elle

Victoria Regalado was born and raised in San Antonio. She is a mother to two daughters, Mila, four, and Jennifer, one. Before enrolling at San Antonio College, Victoria worked as a pharmacy technician at University Hospital. After learning about other professions in the hospital setting, and upon discovering she was pregnant with her second child, she made the decision to go back to school to pursue a career in medical laboratory science.

During her time at San Antonio College, Victoria served as historian for the Student Government Association and was the primary delegate for SAC on the Student District Council. She used her position to advocate for students and help them find resources that can make their academic journeys easier. As someone who struggled herself, she understands the significant difference these resources can make towards keeping students enrolled and completing their academic goals.

Victoria plans to transfer to University of Texas Health Science Center at San Antonio to earn her Bachelor of Science in medical laboratory sciences. She hopes that once she completes that first goal, she can attend medical school to one day become a pathologist.
