## 2014 Distinguished Graduate

## **Brandon Lyssy**Mathematics

"It matters not how strait the gate, how charged with punishments the scroll, I am the master of my fate, I am the captain of my soul."

## **Biography**

-Will Ernest Henley

Brandon Lyssy was always drawn towards math and computer programming even at a young age, but never possessed the skills needed to pursue those avenues. Due to this, he decided to look towards his creative interests such as writing, music, and video editing. After attempting the courses needed for a film degree he was left unfulfilled. This sparked a fire to conquer his weakness in mathematics. Thanks to the help of the professors within the Alamo Colleges Math Department he decided to pursue an interest in computer science and mathematics.

Brandon is currently a member of Phi Theta Kappa and the Northeast Lakeview Math Club. He looks forward to becoming the first person from his family to graduate from college. After SAC he plans on either transferring to The University of Texas at San Antonio or an out of state university to pursue either a degree in computer science or game design.
