I already took the TSI Assessment and need to RETEST...

Students who took the TSI Assessment and did not meet college readiness standards (one or more parts) and need to RETEST are NOT required to complete an additional Pre-Assessment Activity (PAA). Since they completed a PAA in order to take the TSI, they can respond “yes” to TSI background question number 1.

I took the Accuplacer or other previously recognized TSI test and need to RETEST...

TSI compliant students who have not met college readiness standards on the Accuplacer or other TSI recognized assessment (one or all parts) and need to RETEST are only required to complete a brief Pre-Assessment Activity for Students RETESTING on the TSI Assessment in order to say “yes” to TSI background question number 1.

Very Important: Background Question #1

Once you complete the Retest Pre-Assessment Activity (PAA) you are eligible to take the TSI Assessment. The first question of the TSI assessment background questions asks if you have completed a Pre-Assessment Activity:

1. Pre-Assessment Activity: Were you provided with information and/or an activity to help you understand all of the following: 1) The importance of this assessment, 2) Sample Questions, 3) Course options, and 4) Resources for students? Yes / No

It is very important that you answer “yes” to the first background question. If you answer “no”, you will be locked out and unable to continue.

Take Note:

• An Orientation through Dual Credit, College Connections, etc. may also count as the Retest PAA if the sessions include purpose, uses and preparation of the TSI Assessment.
• The Assessment Center at each college will determine the best means of making the Retest PAA document available at college administered test sessions.
• Students must pay the TSI Assessment fee each time you test.
