

Develop *your* employees' career goals with training in our Corporate College

Healthcare leaders around the country agree that the next few years are going to be challenging for hospitals and healthcare systems. Managers are charged with refining healthcare delivery and finding/keeping qualified staff, while dealing with current political pressures.

Delivery system changes will bring increased linkage between performance and payments; increased integration of physicians, hospitals, and long-term care providers; increased access to health services by under-served populations; and increased alignment of coverage with evidence.

STRENGTHEN YOUR SKILLS AND DEVELOP YOUR WORKFORCE.

A+
