This learning community is perfect for students pursuing an Associate of Arts (AA) with a concentration in Business Administration as it fulfills 2 of the 6 “additional requirements” courses for your degree plan!

Learn real world and practical applications through the use of Accounting practices and Economic principles, by way of mathematical approaches and analytical analysis of either public or private sectors.

Students in this learning community will enjoy visits to local businesses to supplement classroom knowledge.

The Learning Community Program at Northwest Vista College is designed to offer you a unique college experience and help you develop dynamic skills needed for college success and graduation.

When you join a learning community you will enroll in two linked courses, which means you will have an opportunity to spend time with the same group of peers throughout the semester and develop a deeper understanding of course material.

This enables you to form new relationships and study groups with other students sharing your same experiences and coursework!

**Enroll early to secure a seat!**
