Professional Development Opportunity
For
High School Teachers

This workshop provides BIMM and related subject teachers the opportunity to become certified in Adobe Dreamweaver. Dual credit teachers should be certified in the application which they are teaching. For teachers who are not currently teaching dual credit, this opens the door for the opportunity to consider teaching dual credit courses for your high school students.

Adobe conducted research to identify the foundational skills students need to effectively communicate using digital media tools. Based on feedback from educators, design professionals, businesses, and educational institutions around the world, the objectives cover entry-level skill expectations for web communication (extracted from www.adobe.com).
