The Writing Center is Increasing Course Completion Rates

The successful course completion rate* of students in developmental courses increases with visits to the Rose R. Thomas Writing Center during the Spring 2011 Semester.

Successful Course Completion:
Results show that students who actively visit the Writing Center double their successful course completion rate.

With no visits to the Writing Center, developmental English students had a successful completion rate of 31%. While students who did visit the Writing Center had a successful completion rate of 64%.

*Footnote: Successful Completion Rate is based on a grade of “C” or better
