

ALAMO
COLLEGES

ST. PHILIP'S COLLEGE

Office of the President

February 24, 2014

Dr. Belle Wheelan, President,
Commission on Colleges
Southern Association of Colleges and Schools
1866 Southern Lane
Decatur, GA 30033

Dear Dr. Wheelan,

This letter is in response to your January 22, 2014 communication about the St. Philip's College December 20, 2013 Modified Prospectus submission. Enclosed is the information you requested regarding St. Philip's College proposed implementation of the Advanced Manufacturing Technology (AMT) program at the:

Workforce Development Center of Excellence: Alamo Academies
800 Quintana Road, Bldg. 8
San Antonio, TX 78211

Specifically, you requested that we respond to the following:

- *Please provide clarification regarding the actual number of program courses and percentage of credit hours that will be delivered at the proposed Workforce Development Center of Excellence (WCoE): Alamo Academies off-campus instructional site.*
- *Please provide a description of discipline-specific library and learning resources for the proposed program.*
- *Please provide a description of physical facilities and equipment which evidence appropriateness of the facility to support this program and instructional delivery.*

Please see the enclosed response. If there additional information is needed do not hesitate to contact me.

Sincerely,

Adena Williams Loston, PhD
President

C: Michael Hoefler, Ph.D. Vice-President, Commission on Colleges

St. Philip's College Response to SACSCOC Information Request

Advanced Manufacturing Technology Program located at:

Workforce Development Center of Excellence – Alamo Academies

Please provide clarification regarding the actual number of program courses and percentage of credit hours that will be delivered at the proposed Workforce Development Center of Excellence (WCoE): Alamo Academies off-campus instructional site.

The nine individual courses offered at the WCoE total 29 SCH, which is 47.5% of the SCH of the program. The program is made up of 61 SCH. See yellow highlights below.

	Lecture	Lab	External	Contact	Credit
Semester 1					
CETT 1409 DC-AC Circuits	4	1	0	80	4
ELMT 1305 Basic Fluid Power	2	4	0	96	3
INMT 2303 Pumps, Compressors & Mechanical Drives	2	2	0	64	3
MATH 1314 College Algebra	3	0	0	48	3
Semester 1 Total:	11	7	0	288	13
Semester 2					
ENGL 1301 English Composition I	3	0	0	48	3
INTC 1357 AC/DC Motor Control	2	4	0	96	3
RBTC 1347 Electromechanical Devices	3	1	0	64	3
MCHN 1438 Basic Machine Shop	2	4	0	96	4
Semester 2 Total:	10	9	0	304	13
Semester 3					
PHYS 1305 Introductory Physics I Lecture	3	0	0	48	3
CPMT 1449 Computer Networking Technology	3	3	0	96	4
ARTS 2326 Sculpture I	3	3	0	96	3
Semester 3 Total:	9	6	0	240	10
Semester 4					
RBTC 1305 Robotic Fundamentals	3	1	0	64	3
INTC 2330 - Instrumentation Systems Troubleshooting	3	1	0	64	3
RBTC 1301 Programmable Logic Control	3	1	0	64	3
WLDG 1428 Introduction to Shielded Metal Arc Welding (SMAW)	2	6	0	128	4
Semester 4 Total:	11	9	0	320	13
Semester 5					
ECT 2266 Practicum (or Field Experience) - Electrical, Electronic, and Communication Engineering Technology/Technician	0	0	16	256	2
INTC 2433 Instrumentation Systems Installation	4	1	0	80	4
ECON 1301 - Introduction to Economics	3	0	0	48	3
RBTC 2339 Robot Programming and Diagnostics	3	1	0	64	3
Semester 5 Total:	10	2	16	448	12
	51	33	16	1600	61

Please provide a description of discipline-specific library and learning resources for the proposed program.

The St. Philip's College Library has two locations. The main location is in the Center for Learning Resources (CLR) located at 1801 Martin Luther King Drive. This is the primary location for this degree program. The second location is in Building 1 at St. Philip's College Southwest Campus located at 800 Quintana Road. This location is directly across the street from the WCoE where 9 of the courses from this program will be offered. Both libraries feature quiet, comfortable study areas, including group and individual study rooms. They offer computers with Internet and software programs for student projects, email, and research. Photocopiers and printers are also provided, as well as rooms for library instruction and media viewing. The Reference and Instruction staff provide research assistance, information literacy classes, and individual support for students and faculty.

The Library's collections include books, music CDs, videos, and DVDs, all of which may be checked out, as well as numerous print periodicals and reference materials for in-library use. If desired, videos may be viewed in the TV/DVD viewing room. The Library's website provides patrons with quick online access to books, articles, and other media through the Alamo Colleges (AC) online Library Catalog and electronic databases. As these tools are web-based, patrons can easily access library holdings and resources from any AC library or from their home or office through the Library's website.

Manufacturing program specific resources include a collection of reference works, codebooks, and handbooks in book, video, and electronic formats. See *Appendix A*. In addition, a wide array of electronic resources, specific to this program, are available to students and faculty through the Library's website. Specialized databases include:

- **Business Economics and Theory (Gale Cengage Learning)** – A collection of academic journals and magazines focusing on topics in economics from more than 150 full-text journals.
- **Business Source Complete (Ebscohost)** – Superior database for full text journals in all disciplines of business, including marketing, management, MIS, POM, accounting, finance, and economics. Additional full text, non-journal content includes financial data, books, monographs, major reference works, book digests, conference proceedings, case studies, investment research reports, industry reports, market research reports, country reports, company profiles, SWOT analyses, and more. Indexing and abstracts for the most important scholarly business journals as far back as 1886 are included, as well as searchable cited references for more than 1,300 journals.
- **Computer Database 1980 - Current (Gale Cengage Learning)** – This database may be used to find computer-related product introductions, news, and reviews in areas such as hardware, software, electronics, engineering, communications, and the application of technology.
- **Computer Source (Ebscohost)** – This database offers full text for nearly 300 publications and indexing and abstracts for nearly 450 publications, covering topics such as computer science, programming, artificial intelligence, cybernetics, information systems, robotics, and software.
- **General Science Collection (Gale Cengage Learning)** – A collection of over 1,000 peer-reviewed journals, providing researchers with the information needed to stay current on the latest scientific development.
- **Safari Books Online (Proquest)** – A student may start here to solve problems, research topics, learn about the latest technology or business trends, and develop critical new skills through access to an ever expanding collection of e-books from experts.
- **Science & Technology Collection (Ebscohost)** – This database provides access to over 830 leading full text journals and indexing and abstracts for more than 1,740 publications covering relevant aspects of the scientific and technical community.

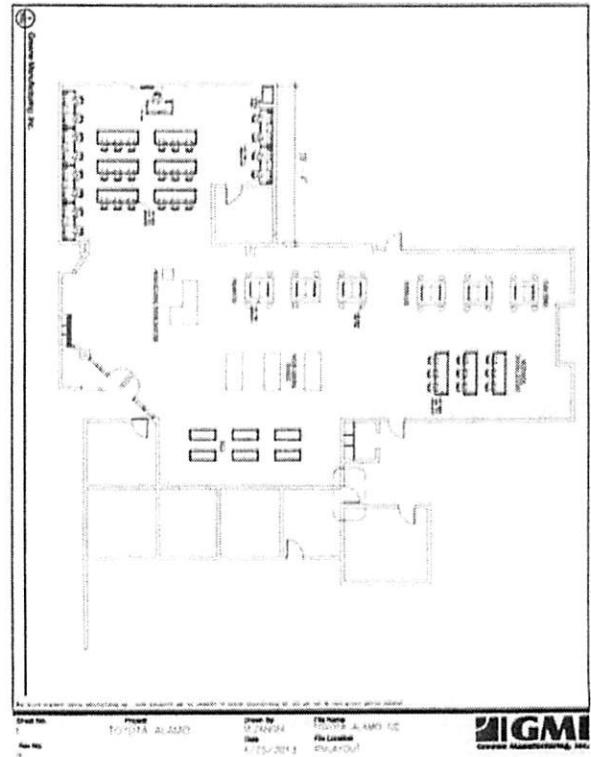

In addition to the resources listed above, at the WCoE, students have access to 18 computers with access to all St. Philip's College and Alamo Colleges electronic resources.

Please provide a description of physical facilities and equipment which evidence appropriateness of the facility to support this program and instructional delivery.

The physical facilities and equipment are appropriate and sufficient to support all the courses in the program offered at this site and that the instructional delivery is fully supported to replicate a real workplace environment. St. Philip's College's main campus is home of the Advanced Manufacturing Technician (AMT) program. The Workforce Center of Excellence (WCoE) building is located in Southwest-Central San Antonio, next to St. Philip's College Southwest Campus and is utilized for many of the technical components of the program. The WCoE contains classrooms and lab facilities to the standard of St. Philip's College Southwest Campus, and include Smart classrooms with computer lab support and climate control.

Construction is being completed at the WCoE with an expected completion date of March 23, 2014 (a design schematic of the lab is attached below). The WCoE has received two robotic arms donated by Toyota and 10 sets (5 trainers) of motor controls donated by Lab Volt. The WCoE has numerous classrooms with computer set ups for instruction. Presently, the WCoE has the follow equipment being phased in.

1. Lab Volt FACET Trainers (12 units)
2. Lab Volt Hydro/Pneumatic Trainers (6 units)
3. Future Tek Mechanical Drive Trainers
4. Lab Volt Industrial Controls (6 units)
5. AMTEC Simulator used or Robotics
6. Plant Pneumatic (60 psi) drop required

The aim of the new lab at WCoE is to transform the place of learning to mimic the function of a real workplace. Toyota and St. Philip's College faculty contributed to the design of the WCoE lab, creating an open industrial-like environment for classes in hydraulics, pneumatics, programmable logic controller, robotics, electronics, mechanics, motor control, and troubleshooting. Not only modern manufacturing processes and technologies can be provided simultaneously, but also the students can become familiar with the industry

environment, as well as coordinate and work with different working groups. The aim is that students can learn the right way the first time by learning in a learning environment that models the work environment. Also, safety and 5S learning labs are conducted in the same environment.

Please provide requested course descriptions for courses scheduled to be offered at the off-campus instructional location.

CETT 1409 - DC-AC Circuits

Fundamentals of DC circuits and AC circuits operation including Ohm's Law, Kirchoff's Laws, networks, transformers, resonance, phasors, capacitive and inductive and circuit analysis techniques.

ELMT 1305 - Basic Fluid Power

Basic fluid power course covering vacuum systems, pneumatic and hydraulic systems, fluid power symbols, operating theory, components, and basic electrical and manual controls.

INTC 1357 - AC/DC Motor Control

A study of electric motors and motor control devices common to a modern industrial environment; a presentation of motor characteristics with emphasis on starting, speed control, and stopping systems.

RBTC 1347 - Electromechanical Devices

A study of basic electro-mechanical devices found in robotic systems, including transformers, switches, and solid state relays.

INTC 2330 - Instrumentation Systems Troubleshooting

Techniques for troubleshooting instrumentation systems in a process environment. Includes troubleshooting upsets in processes.

INTC 2433 - Instrumentation Systems Installation

Synthesis, application, and integration of instrument installation components. Includes a comprehensive final project..

RBTC 1305 - Robotic Fundamentals

An introduction to flexible automation. Topics include installation, repair, maintenance, and development of flexible robotic manufacturing systems.

RBTC 1301 - Programmable Logic Controllers

A study in programmable logic controllers (PLC). Topics include processor units, numbering systems, memory organization, relay type devices, timers, counters, data manipulators, and programming.

RBTC 2339 – Robot Programming and Diagnostics

Emphasis on the programming of industrial robots, the development of programming techniques, and the diagnosis of faults in systems.

APPENDIX A

Discipline-Specific Library and Learning Resources for the AMT Program

Discipline-Specific Library and Learning Resources for the AMT Program

Pending Resources (on order):

American Drive: How Manufacturing Will Save Our Country
