

Directions to the Scobee Education Center at San Antonio College

Scobee Planetarium, Challenger Learning Center, and Santikos Micronaut Center

Scobee Education Center guests often “explore” San Antonio College from the front entrance of the campus at 1819 N. Main Ave. This is the mailing address for the campus. For this reason, we post the physical location of the center as 1198 San Pedro Ave on the web sites. This is the corner at the traffic light on San Pedro Ave. at the western entrance to campus.

From **San Pedro Avenue**, turn **east** at the light nearest into the SAC campus. You will see the large **blue Cheever Star Tower** to your left across the circular turnaround.

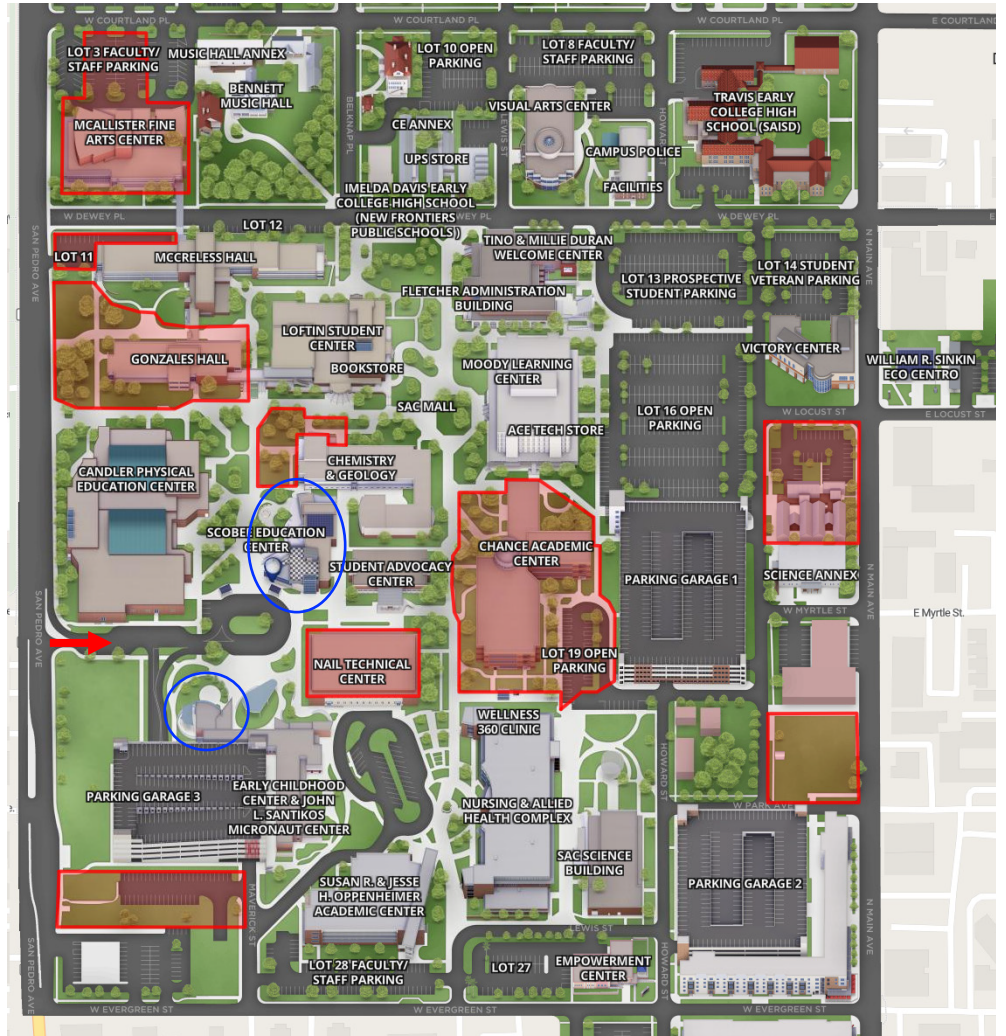

Buses: Limited parking is available on the circle and on either side of the drive closest to the entrance and gymnasium.

Personal Vehicles: Park in Garage #3 to your right as you enter from San Pedro Ave. There is another entrance into Garage #3 from W. Evergreen St. by turning onto Maverick St. into campus.

Guests who need to be dropped off closer the center may be dropped off at the HEB Landing Zone bus ports on the circular drive. The car may then be parked in the garage, if the driver is remaining on campus.

There is a call button and camera to the right of the door on the terrace closest to the blue tower.

This Google map is located at:

Red outlines areas on the SAC maps are construction sites. The QR Code will link you to an interactive map of the SAC campus. The menu on the left side of this web site will identify buildings and the wayfinder symbol in the upper left will provide searchable directions.
