

RE-ADMISSION POLICY

Re-admission policies to the program are as follows:

- 1.** A student voluntarily requesting withdrawal from the program due to personal reasons, i.e., hardship, illness, family emergency, etc. and who is in good standing, (passing all courses, no misconduct, no excessive absences, etc.) may reenter at the point of successful withdrawal based on space availability at the time of reentering and within one year of withdrawal date. Readmission is not automatic; a petition for readmission requires that the student's records be reviewed by the Radiography Technologist faculty. A recommendation from the faculty will be forwarded to the Program Director who will advise the student accordingly. Students readmitted into the program must submit a new criminal background check and drug screen.
- 2.** The student may only re-enter the Radiography Technologist program one time; if the student withdraws a second time, the student must reapply for admission, meet all requirements and compete with all other applicants to begin the program again, as a newly accepted Level I student.
