What to expect for the 2022 Flu season, during the COVID-19 Pandemic?

Getting a flu vaccine is more important than ever during 2021-2022 to protect yourself, your family, and your community from flu. A flu vaccine this season can also help reduce the burden on our healthcare systems responding to the COVID-19 pandemic and save medical resources for care of COVID-19 patients.

Preventive Steps

The CDC recommends a yearly flu vaccine and COVID-19 vaccine. Avoid close contact with people who are sick, cover cough and sneezes, wash your hands, avoid touching your eyes, and clean and disinfect surfaces and objects. Source: <https://www.cdc.gov/flu/about/index.html>.

Both types of diabetes can result in abnormal glucose levels.
